

Ahmed Hamdy Mahmoud [ahmedhamdyau@gmail.com | [GitHub](#) | [Blog](#) | [LinkedIn](#)]

Master of Science, Computer Systems Engineering | Kuala Lumpur, Malaysia

Universiti Teknologi Malaysia (UTM) | Sep 2020 – April 2022

Bachelor of Science, Computer & Communications Engineering | Alexandria, Egypt

Faculty of Engineering, Alexandria University | Sep 2013 – Jul 2018

Experience

Backend Software Engineer @Schoolvoice UAE, Remote September 2024 – Present

Golang, SQL, GraphQL, Docker

- Developed Golang microservices using hexagonal architecture
- Introduced and developed product metrics using Prometheus and Grafana
- Improved customer satisfaction by tracking API latency and optimizing slowest requests, leading to 3x performance gains
- Communicated with end users (Parents) to solve their issues
- Listened to school administrators in product meetings to capture their requirements
- Collaborated with sales team. Attended product introduction with leads, standups and explaining how backend works so they can negotiate deals/integrations better
- Built automation tools using Budibase for Customer Success team to manage daily operations, improving customer satisfaction and offloading the load from engineering team
- Participated in hiring by head hunting candidates
- Wrote user stories for a feature that is planned for migration to golang
- Reached out to investors to help secure a funding round

Backend Software Engineer @Waffy Saudi Arabia, Remote, June 2023 – July 2024

Java/Spring, Microservices, Kafka, Kubernetes, Github Actions, Agile, Jira

- Developed Spring Microservices with payment gateway third party integrations
- Lead code design conversations and wrote feature documentation using Excalidraw and Confluence
- Automated configuration deployments to Kubernetes using Github Actions

Backend Software Engineer @Trella (YCombinator S19) Egypt, Remote April 2022 – May 2023

C#, ASP .Net Core, Microservices, Python, AWS, Git, Agile, Jira

- Collaborated with cross-functional, multi-national teams in Trella which is listed in LinkedIn's best-startups
- Owned a microservice to optimize truck-loads for Trella's largest clients like Amazon and Arma
- Improved scheduling efficiency by more than 20% by collecting requirements directly from truck owners

Software Engineer @cAIRO Lab UTM Malaysia, Hybrid March 2021 – July 2023

AWS, Python, React, Django, Docker, Github Actions

- Developed a Web App that allows users to upload and process workloads that are handled by AWS Batch
- Developed a user portal using React to allow users to track their workloads, cancel and restart them
- Utilized SQS, Batch, EC2, S3, Lambda & ECR on AWS. IaC using Terraform

Open-source Contributions

1. Amazon Web Services, Firecracker | [PR](#) | *Rust*

- Implemented full UDP support for the kernel-network-stack in AWS Lambda's Virtualization Engine
- Worked with TUN/TAP devices to parse/craft ARP, ETHERNET and MAC packets
- Collaborated with AWS Virtualization team to produce a PR that matches their coding standards

2. AdaCore, Accelerometer Driver Support for Micro:bit | [PR](#) | [Blog](#) | *Ada*

- Discovered a missing driver in Ada's framework for Microbit and decided to implement it for [Make with Ada challenge](#)

Certifications / Courses

McKinsey & Company | Forward Program – Equips individuals at different stages of their working life with practical skills to succeed in the future of work. It focuses on critical workplace skills that are relevant and transferable across industries and roles.

Y Combinator | Startup School – Provides practical knowledge on building products, growth marketing, fundraising, and startup operations from industry-leading founders and investors. RetryClaude can make mistakes. Please double-check responses.

Product Management 101 | Bokra Academy Product management fundamentals course by Mohamed Mahrous (Group Product Manager, Foodics)
